WORKSHEET: Create Your Own Case Study

Full Cost Analysis accounts for the Environmental, Social and Economic impacts of an action, product or service. We have provided a Case Studies for you to use as examples with our module.

At this point you should be able to create a case study of your own. Think about your campus, your community or your region. What local programs currently aim to fulfill the principles of FCA?

Use the worksheet below to formula your own case study and list the Benefits and Costs of this Case Study on page 2.

1.

Define your Case Study:
What Program have you selected to be your Case Study?

2.

What is the purpose of the Program in your Case Study?

3.

Who are the people and organizations involved in the Program you have selected?

4.

What role do each of these people and organizations play in the Program you have selected?

5.

What is/are the goal/s of the Program you have selected?

6.

Does the Program meet this/these goal/s? Are there ways that the Program could be improved or expanded to better meet this/these goal/s?

WORKSHEET: Create Your Own Case Study

Now that you have created a Case Study from your community, list the Benefits and Costs in the space provided.

BENEFITS

Economic

Social

Environmental

We consider truly sustainable solutions to exist in the center of the diagram. In other words, they are economically, socially and environmentally sustainable. Can you think of a solution for your Case Study that meets all of these criteria?

COSTS

Now that you have considered the benefits of your Case Study, please consider the cost associated with not having the program you have considered.

Economic

Social

Environmental
