MU. TEMPEN ð. 1009 o.'s The Daily such a great mista could persuade him to make the demand Picayune. RIES!! the der NO FALSE ISSUE. we are inclined to sented to him, required decision, he will decision We have not had space to publish the mass of papers found on John Brown after the suppression of the Harper's Ferry riots, nor any of the numerous documents, letters and cards which have appeared in the Northern journals explanatory of the connection with or speers found on John Brown after the suppression of the Hurper's Ferry riots, nor any of the numerous documents, letters and cards which have appeared in the Northern journals explanatory of the connection with it of persons supposed to be implicated. The last and most voluminous of these issues is a mase of documents furnished by one Col-Forbes to the New York Berald. Forbes was an English adventurer, who became a paid agent for Abolitionism in this country. His special function appears to have been the management of the "underground railroad" department, the stealing and runting off of slaves: and he was by his own showing a bnay operator in the work of bringing about a concert among Abolitionists as to the most effectual way of attacking the existence of slavery in the States.

It seems that the business did not pay, as the last that the Abolitionists did not pay, as they rromised. They undertook, as Forbes states, to support the family he left in Europe, while he was working for their views here. But they failed to pay, and he, in return, exposes and denounces them. We have read his testimony, with the other papers. As they are in the nature of disclosures by a confessed accomplice, under the impulse of disappointment and for revenge, they are to be received with a good deal of caution, where they are not confirmed by other and independent testimony.

The general impression of these publications in the North, and was not specifically known to or approved by many persons of influence. But it is quite clear, that the idea on which John Brown proceeded, that slavery is to be attacked in the Southern States from the North, has obtained a wide circulation, and has commanded money, aid, and sympathy, to a large degree, among Northern people. It is very evident that Brown's ammosities were shared by a good many people, who were not ready to adopt the policy of manifesting them in the way and at the time which he selected: who thought, with more sagacity than he, that his attempt must fail, and the effect be toc questionable, to say serted with the inte between States.
