The Daily Pigment.

Cプラ KIN'S INSANITY.

WE suspicion is likely to be true, though it is not yet confirmed by official report. The fact is, however, that we have learned from reliable sources, that Mr. KIN, who is one of the leading business men of this city, is now suffering from an acute mental disorder, and that he has been placed in an asylum.

The cause of this insanity is unknown, but it is believed to be due to some personal sorrow, which has overwhelmed his mind. He was a man of strong constitution, and had always been healthy until recently. The symptoms of his disorder are, however, very alarming, and it is feared that he may not recover.

The family of Mr. KIN is deeply grieved at this sudden occurrence, and are doing all in their power to alleviate his suffering. The doctors in charge of the case are also doing their best to restore him to reason. We hope that he may soon be restored to health and happiness.

that resistance. He came to preach sedition and robbery, as the proper instruments for the abolition of his idol worship.

The pursuit of these objects became his only object in his thoughts that it got to be the one thing which dominated exclusively over all other thoughts, and made a fierce and bloody fanatic of him who was not naturally cruel by temperament.

We have said that it is not surprising that the effect of recent events should have unvied a man of this cast, with a brain no severer and a judgment so shatter'd as his, but that the cause is not to be found in any man not too dearly prepared with untold misery, the result of the outburst at Harper's Ferry must have been a dreadful shock. That he had a guilty knowledge of the plans of the one and of the spirit of invasion, in some form, in its true character, or, if it be true that Brown is, as is very evident, is in harmony with opinions publicly expressed, the cause and the manner in which he has been pursued is quite as likely that he gave money directly for this particular object. He has substances large sums for objects of the same essential character; and this is but the practical embodiment of the theories he has preached and labored for.

If he has any sensitivity left—if he be not entirely without nerves and heart, a more beneficent government or the blameless public and the alarm at the consequences of the crimes with which he has been encouraging so recklessly—"the crime to which he has been inducing others, and for which they are to pay the forfeit of their lives. If there were no remonstrance for the train of unexampled calamities which the success of their attempt would bring upon hundreds of innocent families, there would, at least, be composition, sorrow, and regret, for the delinquent conspirators who rushed into this foolish enterprise under the influence of such doctrines as Gerrit Smith has preached, and in the expectation of succor from such men as he is, and as he prepares for such work. He cannot feel that he is morally guilty of their blood—their tempers into the crimes which they have led him to shameful death.

Perhaps the sense of this awful responsibility may come with sudden awakening effect upon the conscience, and startled it into a knowledge of the enormity of the crimes to which it had been dragged, and the levered brain gave way before the shock. Perhaps the fear of consequences, the experience of the reversals of life, and the apprehensions for himself, may have helped to overthrow reason, and to give a relief from present terror, and an asylum from punishment in the unconsciousness of madmen. None of these are improbable effects of the Harper's Ferry events on a man of Gerrit Smith's temperament, history, frailties and fanaticism, and by what he has been, at least, composition, sorrow, and regret, for the delinquent conspirators who rushed into this foolish enterprise under the influence of such doctrines as Gerrit Smith has preached, and in the expectation of succor from such men as he is, and as he prepares for such work. He cannot feel that he is morally guilty of their blood—their tempers into the crimes which they have led him to shameful death.

As the Czar,

The Czar and the Czarina are in the best of health, and have been visited by the Emperor of France and the Emperor of Austria. The Czarina is expected to return to St. Petersburg soon, and the Czar is expected to return to Paris later in the fall.

F. W. D.
