Being Left Out of an Era of Connectivity:
The Implications of Increasing Reliance on Mechanical Mediums of Mass Communication for Anxiety and Fear of Exclusion

McKay Friley and Valentina Romero
Introduction

- Necessity to be connected through technology.
- This is especially prevalent on college campuses.
- Missing the digital real makes you suffer in real life.
- Being connected through digital needs is no longer a luxury but an expectation in our society.
So What?

- YOU!
- Furman Engaged Poster Example
In our research, we set out to discover what were the reliance levels on mechanical mediums of mass communication, and what were those level’s implications upon social anxiety and fear of exclusion in college aged students?

On a scale of 1-5 (with 1 being the weakest and 5 being the strongest) how important is your mobile device to you on a daily basis?

1 □  2 □  3 □  4 □  5 □

On a scale of 1-5 (with 1 being the lowest and 5 being the highest) rate the level of stress you would experience if, on a given day, you forgot to bring your mobile device with you.

1 □  2 □  3 □  4 □  5 □
Literature Framework

- Mechanical Mediums of Mass Communication
- Nomophobia
- Relationship between media usage and behavioral changes.
- Measuring Levels of Anxiety
Hypothesis

- Our hypothesis centers on the notion that the increasing levels of reliance on mechanical mediums of mass communication increases the social fear of being disconnected and potential exclusion.
Data Collection Method

- Systematic Random Sample
- Furman University (all college aged students)
- Contacted 198, received 86 completed surveys (43% response rate)
- Self Administered Survey
- $20 Cash Prize Incentive
Definition of Measures

- Outcome Measures:
  - Anxiety
  - Fear of Exclusion

- Independent Measures:
  - Mechanical Mediums of Mass Communication

- Control Measures:
  - Gender
  - Level of Workload
  - Presence of Cellular Device
Definition of Measures: Predicted Outcomes

- As the reliance upon and frequency of use of mechanical mediums of mass communication increases, the levels of self perceived anxiety and fear of exclusion will increase as well.
Analytic Methodology

- **Mechanical Mediums of Mass Communication: Frequency**
  - Ordinal
  - MCT: median and mode

- **Anxiety or Fear of Exclusion:**
  - Scale
  - Interval/Ratio

- **Control:** gender, level of workload, relationships
  - Able to conduct cross tabulations of comparison.

- **Future Analysis:**
  - Regression Analysis
On a scale from 1-10 (1 being low and 10 being high), please rate the level of self perceived anxiety from the past month considering issues pertaining to your relationship with family, friends, and others?

1 2 3 4 5 6 7 8 9 10

On a scale from 1-10 (1 being low and 10 being high), please rate the level of self perceived anxiety from the past month considering issues pertaining to your school workload and deadlines?

1 2 3 4 5 6 7 8 9 10
Please indicate how strongly you agree or disagree with the following statements.

Who Deletes Social Media Posts?

- Judgement of Post by Followers
- Lack of Positive Feedback from Social Media Followers
- Likeability of Post

- Other
- Female
- Male
## Results: Survey Questions

### Have you ever Deleted a Post from Social Media?:

<table>
<thead>
<tr>
<th></th>
<th>Male</th>
<th>Female</th>
<th>Other</th>
</tr>
</thead>
<tbody>
<tr>
<td>Yes</td>
<td>22</td>
<td>50</td>
<td>1</td>
</tr>
<tr>
<td>No</td>
<td>6</td>
<td>10</td>
<td>0</td>
</tr>
</tbody>
</table>

### Reasons for Deletion:

<table>
<thead>
<tr>
<th>Reason</th>
<th>Male</th>
<th>Female</th>
<th>Other</th>
</tr>
</thead>
<tbody>
<tr>
<td>Likeability of Post</td>
<td>7</td>
<td>25</td>
<td>0</td>
</tr>
<tr>
<td>Lack of Positive Feedback</td>
<td>2</td>
<td>16</td>
<td>1</td>
</tr>
<tr>
<td>Judgment of Post by Followers</td>
<td>8</td>
<td>14</td>
<td>0</td>
</tr>
</tbody>
</table>
If you have social media, have you ever deleted a post?

- [ ] Do not have any social media
- [ ] Yes
- [ ] No

If yes to question 9, why did you feel the need to delete the post? Please circle all that apply.

- [ ] Not Enough Positive Feedback
  (i.e. likes/favorites/re-tweets)
- [ ] Fear of Judgment of Post
- [ ] Second Guessing of "Like-ability" of Post/ How Others Will View it
- [ ] Other (please specify)
Results Contd.

Academic Notifications and Anxiety Levels

- Low Email: Low Anxiety - 2, High Anxiety - 2
- High Email: Low Anxiety - 27, High Anxiety - 54
How often do you get notifications of academic opportunity updates (class, sessions, assignments, meetings, seminars) through mechanical mediums of mass communication (i.e. email, texting, online sources)

- Never
- Less than Once a Month
- Once a Month
- 2-3 Times a Month
- Once a Week
- 2-3 Times a Week
- Daily
- Multiple Times Throughout the Day

How often do you communicate with professors, coaches, and/or faculty/staff through technology?

- Never
- Less than Once a Month
- Once a Month
- 2-3 Times a Month
- Once a Week
- Daily
- Multiple Times Throughout the Day
Conclusion

- Limitations:
  - Measuring anxiety
  - Respondent Number
  - Discretion Left to Respondents
  - Preliminary Results

- Conclusions:
  - Women
  - Cell phone connectivity is the norm.
  - As usage of mechanical mediums of mass communication increases, there is a higher association of self perceived anxiety.
